

## Workplace Injury Reporting Platform

Occupational Medicine - Digital Innovation

### POSITIONING

For enterprises, employee representatives, individual associates, and medical providers who file workplace injury reports. WIRP will document incidents, file reports, collate analytics, and produce records in a user-friendly and secure system. Different from paper documents, WIRP's streamlined digital process creates accurate and timely immutable records that reduce insurance costs and increase overall safety.

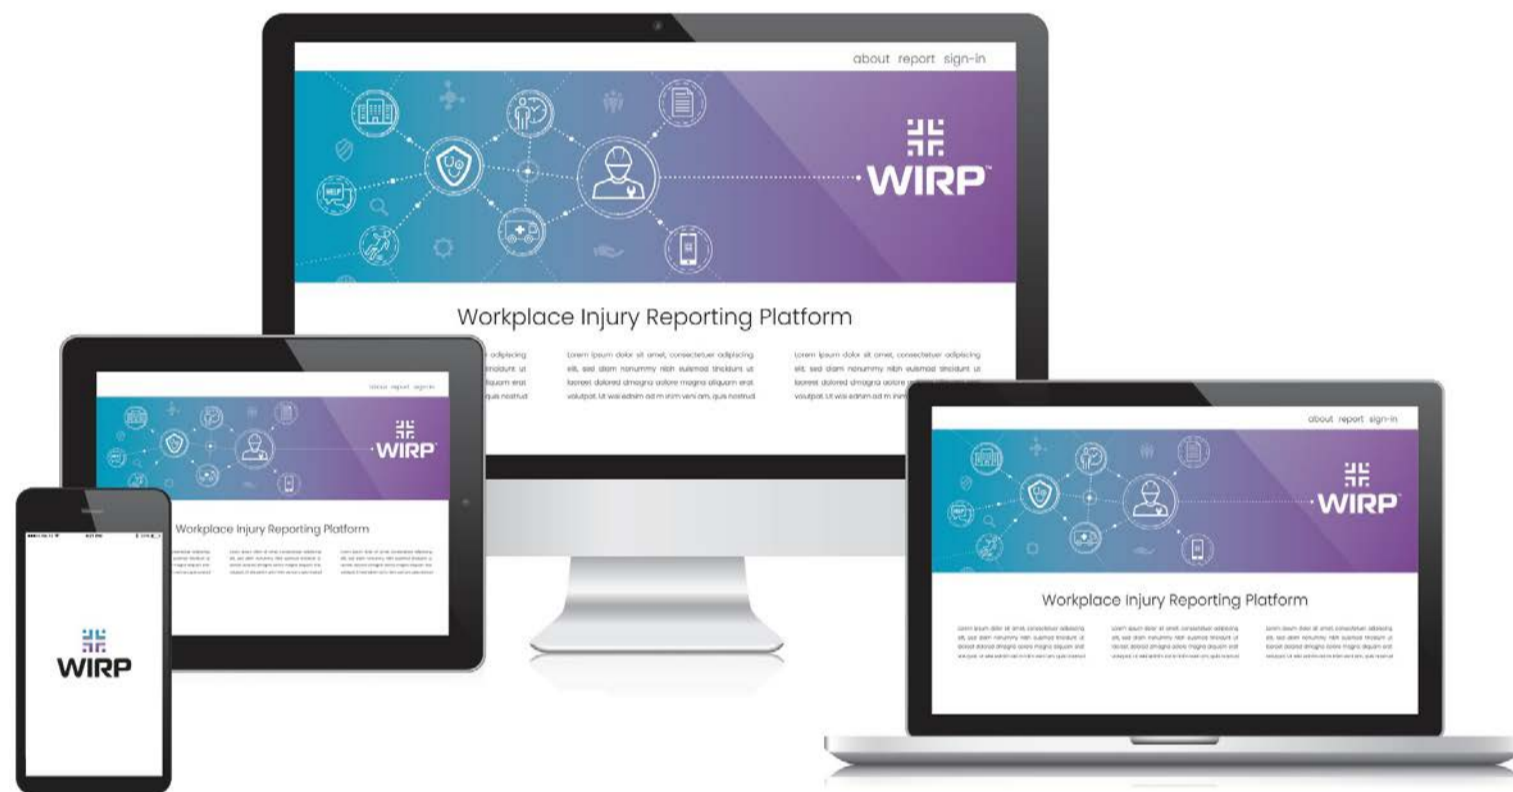

### WIRP PLATFORM SUMMARY

WIRP is designed as an enterprise solution for employee representatives, individual associates, and medical providers who file workplace injury reports. WIRP streamlines the process of First Report of Injury (FRI), case status and report production in a secure, user-friendly platform. Uniquely different from paper documents, WIRP's streamlined digital process creates accurate, timely and immutable records. Analytics generated by WIRP can be used to accurately identify workplace hazards, reduce lost productivity time, minimize fraudulent claim investigations, and lower a company's Experience Modification Rating.

WIRP is a digital productivity platform and industry-specific custom website portal. Our core data structure focuses on loss reduction by establishing steps to report incidents, manage injuries, maximize reporting efficiency, and lower overall cost to the employer.

### MILESTONES

- Established August 2018
- Secured Seed Funding February, 2019
- Team Expansion August, 2019
- Launch MVP June, 2020

### ACQUISITION CHANNELS

- Industry Referrals
- Social Media Platforms
- Target Specific Market
- B2B Business Development
- Industry Networks

### PROBLEMS

Currently, in 2019, workplace injury reports are documented on paper and reported via individual scanned/faxed forms tracked by the enterprise manager. Our platform solves the inefficiencies of the current antiquated medical injury reporting system.

- Injuries are not being documented in an accurate, timely manner
- Paper forms can be lost or edited after the report is written
- No user-friendly way to incorporate images and video into a report
- No comprehensive way to document time-sensitive witness statements
- No efficient or reliable way to identify workplace safety trends
- No digital platform streamlining the reporting process

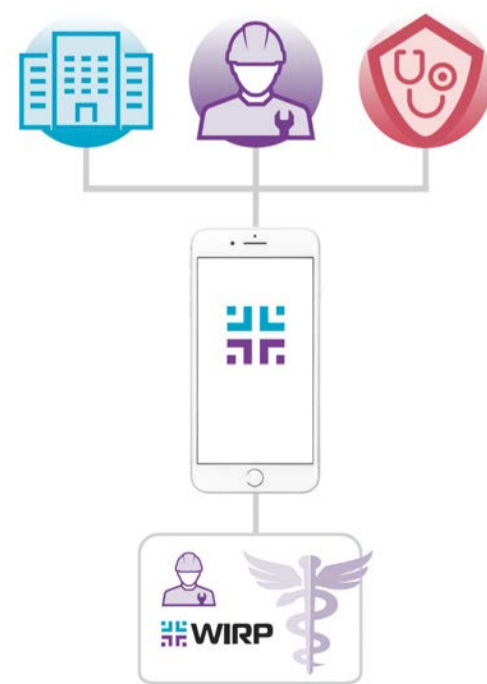

### SOLUTIONS

WIRP revolutionizes the process of recording and managing workplace injuries by implementing a user-friendly record-keeping process. Smart data analytics reveal safety trends by creating an electronic record of each aspect of a workplace injury customized to the enterprise, user group, and medical provider.

- WIRP is designed to incorporate HIPAA safeguards and compliance protocols
- Digital platform manages the entire reporting process
- Industries: Occupational Medicine + Medical Management + Trade Associations + Insurance & Reinsurance

### WIRP'S VISION

To create and verify the conditions for ultimate workplace safety and wellness.
